Mr. Javier González  
TCA Federal Monitor  
San Juan, Puerto Rico

Dear Mr. González,

As requested, we are submitting a summary of the work done before and during the fieldwork of the **Detainees Survey 2022**.

	Original Proposal	Result
Target	Citizens arrested by the PR Police Bureau in a period of <u>3 months</u>	Citizens arrested by the PR Police Bureau in a period of <u>2-3 weeks</u> ( <u>decided by TCA</u> )
Universe	TCA will provide a data base with the contact information of each detainee. Estimated base of 800 to 1,000 contacts.	Only 87 contacts were provided. In the next table, the detailed report of each contact.
Sample	Estimated final sample of at least 150 cases.	Only 15 complete interviews.  After several attempts (+5) with each contact, was agreed with TCA to stop the fieldwork.
Methodology	CATI interviewing technique	CATI interviewing technique  Those contacts that provide an email address were also contacted by mail.
Deliverables	Data processing and report	Data processing (tables) for a directional assessment.  Was agreed with TCA that 15 cases were not enough to provide an analysis and report of results.

The lack of sample was the main reason for a not productive fieldwork. We know that during several months the team was deliberating the legal risks of share a full data base with the contact information of each detainee and that the final decision was to collect the information directly in the

Police Stations. We don't know the specific situations in the Police Station during the weeks the data should be recollected, but our hypothesis (the same discuss in the past) there was not the place and momentum to invite a recent detainee to participate of this type of survey. Also, there was not a person responsible of validating the information filled in the document, affecting the quality, and allowing duplicate contacts.
